Yulin Yu

Windsor, ON | 226-961-0191 | yuyulin@uwindsor.ca | linkedin.com/in/yulin-yu-1b53a6421

HIGHLIGHTS OF QUALIFICATIONS

- Experience troubleshooting live software applications by reproducing defects, analyzing logs, and tracing API, authentication, routing, and data-access issues.
- Hands-on full-stack experience maintaining four existing AI-powered SaaS applications across React/TypeScript frontends and Node.js/Express backends.
- Experience resolving payment and subscription issues by repairing Stripe webhook delivery and synchronization logic, then verifying resulting account updates.
- Ability to implement, deploy, and verify fixes in Firebase and Google Cloud environments through functional and end-to-end testing.

TECHNICAL SKILLS

Programming: Python; JavaScript; TypeScript; SQL; HTML/CSS
Frameworks & APIs: React; Node.js; Express.js; Django; Vue.js; REST APIs
Cloud & Data: Firebase Authentication/Hosting; Firestore; Cloud Functions; Google Cloud Run; MySQL
Troubleshooting & Tools: Bug reproduction; Log analysis; API troubleshooting; Git; GitHub; Linux; Stripe; Functional and end-to-end testing

EDUCATION

Master of Engineering in Electrical and Computer Engineering Jan. 2025 - Jun. 2026
University of Windsor, Windsor, ON

Bachelor of Engineering in Network Engineering Sep. 2019 - Jun. 2023
Tianjin Chengjian University, Tianjin, China

RELATED EXPERIENCE

Full-Stack Software Developer Mar. 2026 - Sep. 2026
Diagverse LLC

- Maintained and improved four existing AI-powered SaaS projects, modifying React/TypeScript frontends and Node.js/Express backends and deploying fixes to production.
- Reproduced and diagnosed loading and connectivity issues by tracing API URLs, CORS, Firebase rewrites, authentication configuration, Cloud Run/Firebase logs, environment variables, and backend routing.
- Resolved Stripe checkout and subscription issues by repairing webhook delivery and synchronization logic; corrected Firestore Security Rules and verified affected workflows before production release.

Programmes and Digital Content Intern May 2025 - Aug. 2025
Doctors on Ground (DnG) | Remote

- Designed and maintained public-facing healthcare webpages using Google Sites.
- Created and updated supporting visual content in Canva for ongoing website and digital-content needs.
- Managed recurring webpage and content updates to maintain an active public-facing web presence.

Computer Vision Intern Jul. 2023 - Aug. 2023
Institute of Automation, Chinese Academy of Sciences | China

- Reproduced a YOLOv5 object-detection pipeline in Python and PyTorch, configuring COCO-formatted datasets, training, validation, and inference workflows.
- Diagnosed missed detections on small objects and adjusted data augmentation, training settings, and confidence thresholds to improve detection sensitivity and bounding-box consistency.

TECHNICAL PROJECTS

Health Recipe Recommendation System
Django | *REST APIs* | *MySQL* | *Vue.js*

- Built a full-stack recipe platform with Django APIs, MySQL, and Vue.js; implemented registration, authentication, profiles, saved preferences, and personalized rule-based recommendations.
- Developed a web-scraping and data-processing workflow to organize recipe records in MySQL and deliver recommendation results through frontend-backend APIs.
